Product Description

Performance You Can Feel

The Trekker pellet insert with Efficient Energy (E2) technology is the most powerful and efficient insert ever designed by Quadra-Fire. E2 technology helps achieve 83.2% efficiency—saving money by burning less fuel. The standard 7-day programmable thermostat, 52 lb hopper and easy-clean cast iron firepot ensure this pellet insert is easy to operate. And these efficient pellet-burning inserts are the only inserts available with cast iron construction on all major components—proving it's built to last.

- Heat large spaces with up to 51,000 BTUs—heats up to 2,900 square feet, based on climate and home efficiency
- EPA certified, with low emission levels of .74 grams per hour
- Load less fuel with a 52lb hopper
- Use less fuel with 83.2% efficiency
- Exclusive "Efficient Energy" (E2) burn technology makes it easy to maintain your heat
- Cast iron heat exchanger, firepot and exterior add detail and durability
- 7-day programmable thermostat
