Product Description

Create a stunning focal point in your outdoor living space with the **Outdoor Lifestyles Vesper Gas Fireplace**. This unit is defined by its massive **27-inch tall opening**, offering a commanding view of the flames that rivals traditional wood-burning hearths. Engineered for a true masonry appearance, it features a "brick-to-brick" opening and a stainless steel mesh screen to keep debris out.

The Vesper is a **vent-free** system, making it ideal for enclosed locations where venting is difficult (always check local building codes). You can fully customize the look to match your patio's style by choosing between a **36" or 42" width**, selecting from three realistic log sets, and picking either a traditional or herringbone brick interior.

Need Service? We don't just sell fireplaces; we maintain them. We offer professional [fireplace repair services](#) to ensure your unit runs safely and efficiently for years to come.
